By Name Registry

- The Homeless Management Information System (HMIS) will be the portal for the by name registry of people experiencing homelessness, as well as the method for assessing and matching households to housing and support.
- Using a by name list allows for the creation of housing plans for eligible households and identifies gaps in the system
- A coordinated entry assessment in HMIS allows for matching the household to a housing intervention
- For those who have not completed an assessment, completing an HMIS consent form will allow for sharing of location for follow up engagement
