

Quarterly Data Quality Process

March 3, 2025

Quarterly Data Quality Process

- Context
- Missing Values / Data Issues
- Child-Only Entries
- Utilization
- Timeliness
- Who Participates
- Report Details
- Overview
- Submission Process
- Data Quality Timeline
- Accessing / Reviewing Report (Live Demo)
- Trouble Shooting
- Resources / Support

Context

The Chicago Continuum of Care (CoC) utilizes data-informed approaches to coordinate services and resources in its efforts to end homelessness.

Homeless Management Information System (HMIS) data quality is an important factor to measure efforts to end or prevent homelessness.

The CoC relies on the work of all providers of all funding types to enter accurate, complete, and timely data to ensure we have the information we need to make informed decisions as a community.

Context

Due to this importance on data, and in order to maintain data quality, providers in the HMIS are expected to participate in a quarterly data quality process that addresses data in the following four areas:

- Missing Values / Data Issues
- Child-Only Entries
- Bed Utilization
- Timeliness

Missing Values / Data Issues

No more than 5% of clients enrolled in the project can miss any data element including the Data Not Collected answer.

Name, SSN, and Date of Birth data elements include Client Doesn't Know and Client Prefers Not to Answer as Errors.

Data Element	Required for
Name	All
Social Security Number	All
Date of Birth	All
Race	All
Ethnicity	All
Gender	All
Veteran Status	Adults
Prior Living Situation	Adults/HoH
Length of Stay in Previous Place	Adults/HoH
Relationship to Head of Household	All
Client Location	HoH ONLY
Domestic Violence	Adults/HoH
Disability Entry	Adults/HoH
Disability Exit	Adults/HoH at Exit
Income at Entry	Adults/HoH
Income Exit	Adults/HoH at Exit
Non-Cash at Entry	Adults/HoH
Non-Cash at Exit	Adults/HoH at Exit
Insurance at Entry	All
Insurance at Exit	All at Exit
Destination at Exit	All at Exit

Missing Values / Data Issues

Both Primary Race and Ethnicity fields were retired and replaced during the 2024 Data Standard changes.

Race fields located in the Summary (Tab A) and the Details (Tab B) have been updated and will now be pulled from the new Race and Ethnicity field.

The Ethnicity field has been marked as “Retired” in the Details. Error Percentages for Ethnicity in the Summary have been defaulted to 0%.

Race and Ethnicity	Ethnicity
White	Retired
Null	Retired
White	Retired
Null	Retired
White	Retired
Black or Asian American	Retired
Null	Retired
Null	Retired

Data Element	Required for	Applicable Entries	Count of Error	Error Percentage
Name	All	29	15	51.72%
Social Security Number	All	29	10	34.48%
Date of Birth	All	29	14	48.28%
Race	All	29	17	58.62%
Ethnicity	All	29	0	0.00%
Gender	All	29	12	41.38%
Veteran Status	Adults	27	11	40.74%

Child-Only Entries

There must be zero child-only entries. A child only entry is flagged when a client under the age of 18 is enrolled in a project without being connected to a parent/guardian. This can happen for two reasons:

1. The child was entered separately from their parent/guardian
2. The client's date of birth is missing

If your project serves unaccompanied youth under 18, we ask that you send a ticket to Helpdesk@allchicago.org

Child Only Entries (Tab C):	
Entries in which there is no adult at enrollment	

Utilization

Bed/Unit utilization must be within the following ranges:

- Emergency Shelters: 80%-105%
- Transitional Housing: 80% - 105%
- Permanent Supportive Housing: 85% - Greater
- Rapid Rehousing: 85% - Greater
- Safe Haven: 85% - 105%

The utilization for the majority of project types looks at how many clients were enrolled in your project on November 21, 2024, as compared to how many beds/units are indicated in your Bed and Unit Inventory sheet. PSH and RRH projects require that clients have a Housing Move-in Date on or prior to November 21, 2024, to be included.

As long as either bed or unit utilization meets compliance standards, the project as a whole will be considered compliant for utilization.

Utilization

Utilization		
BED UTILIZATION		
<p>Comparing the number of Clients Enrolled on with the number of Beds</p> <p>If the Project type is PH, the client must have a housing move in date that is in range of the enrollment</p> <p>If the number of beds is inaccurate, please visit the helpdesk and fill out a unit list update form</p>	Bed Inventory	
	# Enrolled	
	Bed Utilization Rate	
ROOM/UNIT UTILIZATION		
<p>Comparing the number of Households Enrolled on with the number of Rooms/Units</p> <p>If the Project type is PH, the clients must have a housing move in date that is in range of the enrollment</p> <p>If the number of rooms/units is inaccurate, please visit the helpdesk and fill out a unit list update form</p>	Unit Inventory	
	# Households Enrolled	
	Room/Unit Utilization Rate	
UTILIZATION COMPLIANCE		
Projects are measured by their project type, and the project must be in compliance with either their bed or unit utilization, if one is out of compliance but the other is not, then the project as a whole is still in compliance	<p>Emergency Shelters: 80%-105% Transitional Housing: 80% - 105% Permanent Supportive Housing: 85% or greater Safe Haven: 85% - 105%</p>	

Utilization Change

A Housing Move-in Date column has been added to the Client Details tab so that PSH and RRH providers can see which clients are being counted in the utilization table.

PSH and RRH clients must have an HMID added that is on or before the PIT date and the HMID is on or after the Entry Date. HMID before the Entry or after the set PIT date (11/21/24) will not be included in the utilization table. They will show on the Client Details tab as "Date out of range".

"Date out of range" is NOT always an indication of an error. If the client has a HMID after 11/21/24 they will not be included in the utilization table, but this date should not be changed in HMIS if it's a valid entry.

If you are working on an RRH project and the Bed and Unit inventory is NULL, please reach out to Helpdesk@allchicago.org.

Insurance at Exit	Housing Move in Date	Destination at Exit
-	6/1/07	
-	8/1/06	
-	Date out of range	
-	Date out of range	
-	10/22/13	
-	10/22/13	
-	10/22/13	
-	11/24/04	
-	Date out of range	
-	11/24/04	
-	8/19/06	
-	8/17/06	
-	11/18/06	

Housing Move-in Date

05 / 22 / 2024

Client's current Housing Type/Location:

Rental by client, no ongoing housing subsidy (HUD)

Timeliness

Timeliness is tracked through an automated report created by All Chicago. This timeliness report will track the timeliness:

- At entry
- At exit
- At housing move-in dates
- For shelter services

Timeliness measures the time it takes to create an element in HMIS. This measure applies even if the entry date is backdated. For instance, if a client originally came into a project on 12/1/2024, but they were not entered into that project in HMIS until 12/4/2024, the information will be considered out of compliance as it took 3 days to indicate that the client was enrolled in the project. Timeliness data cannot be corrected.

Who Participates

All projects, regardless of funding, are required to participate in the quarterly data quality process. So long as a project is active and has at least one client enrolled.

Please refer to the list of currently active projects that are expected to participate in the data quality process.

<https://hmis.allchicago.org/hc/en-us/articles/115005062126>

If the project does not enter data into HMIS they are not required to participate in the DQ process.

Report Details

Reports must be generated for 1 project at a time

The report will be looking at the period from October 1, 2024, to December 31, 2024

In the report, the point-in-time date is set for November 22, 2024 (PIT Date Plus one day)

This looks at how many clients were enrolled on the night of November 21st against how many units/beds the project is reported to have.

This Quarter's Overview

- Data Quality process will go from March 3rd – March 14th
- There will only be one round for submissions. Providers will not need to send in DQ reports until they are ready for final submission.
- BusinessObjects reports, which can only be downloaded by users with access to BusinessObjects, will cover the following:
 - Missing values
 - Child-only entries
 - Bed utilization
- Changes made in HMIS will not generate in BusinessObjects until the following day.
- The SQL report will be sent to ATAs and will cover the following:
 - Timeliness

Submission Process

Reports are to be submitted by the March 14th deadline.

.xlsx Files must be renamed using the ChicagoDQ_----_yyyy-mm-dd template. Adjust the project ID (----) and the date (yyyy-mm-dd) in the file name before submission

The project ID number in the file name MUST be 4 digits. If a project has less than a 4-digit ID number a "0" should be placed before the ID number in the file name.

Sending Reports

- To submit the Chicago DQ report, please create an email to **DataQuality@allchicago.org**.
- The subject line must be “**Data Quality Report Submission Attachments**”.

Agencies with more than one project can attach all their data quality reports together in one email; there is no need to send them separately.

Please ensure that the files attached are Excel files. PDF files will not be accepted.

Data Quality Timeline

Accessing / Reviewing DQ Report

Troubleshooting

Troubleshooting

- Legend can be found on the tab titled Client Detail Key
- This key will provide details on the location of questions in HMIS
- Name DQ, SSN DQ, and Veteran Status are the only questions that will be found outside of the enrollment assessment. These questions are in the Client Profile.

Client Detail Key

Alert	Description
Cell Contents	The value is of low quality and might be improved if reviewed with the client. APS - Approximate or Partial SSN PNR - Partial Name Reported ADB - Approximate or Partial DOB DKR - Client Doesn't Know or Client Refused
-	Displays a dash if the particular element does not apply to the client. Most often appears on children/non heads of households and exit values for unexited clients.
Null or DNC	Value is missing
Mismatch or HUD Verif	The Yes/No answer to whether or not the client has a Disability or is receiving any Income, any Non-Cash Benefit, or any Insurance does not match the sub-assessment. For example, if the answer is "Yes" to the question about if the client has any kind of Disability, there must be one identified in the sub-assessment as being a disabling condition. If the answer is "No" to the question about if the client receives any kind of Income, there must not be any source of income identified in the sub-assessment.

Field in Table	Question in Assessment
Name Data Quality	Looks at the Name Data Quality question located in the Client Profile tab.
SSN Data Quality	Looks at the SSN Data Quality question located in the Client Profile tab.
DOB Data Quality	Looks at the Date of Birth Type question located in the Entry assessment.
Primary Race	Looks at the Primary Race question located in the Entry assessment.
Ethnicity	Looks at the Ethnicity question located in the Entry assessment.
Gender	Looks at the Gender question located in the Entry assessment.
Veteran Status	Looks at the U.S. Military Veteran question located in the Client Profile tab.
Prior Living Situation	Looks at the Prior Living Situation question located in the Entry assessment.
Length of Stay	Looks at the Length of Stay in Previous Place question located in the Entry assessment.
Relationship to HOH	Looks at the Relationship to Head of Household question located in the Entry assessment.
Location	Looks at the Client Location question located in the Entry assessment. Selection other than IL-510 will show as error.
Domestic Violence	Looks at the Domestic violence victim/survivor question located in the Entry assessment.
DV Experience	Looks at the "If yes for Domestic violence victim/survivor, when experience occurred" question located in the Entry assessment. Only if YES for Domestic violence victim/survivor question was selected.
Disability at Entry / Disability at Exit	Looks at the "Does the client have a disabling condition?" question and Disabilities sub-assessment located in either the Entry or Exit assessment respectively.
Income at Entry / Income at Exit	Looks at the "Income from Any Source" question and Monthly Income sub-assessment located in either the Entry or Exit assessment respectively.
Non-Cash at Entry / Non-Cash at Exit	Looks at the "Non-cash benefit from any source" question and Non-Cash Benefits sub-assessment located in either the Entry or Exit assessment respectively.
Insurance at Entry / Insurance at Exit	Looks at the "Covered by Health Insurance" question and Health Insurance sub-assessment located in either the Entry or Exit assessment respectively.
Destination at Exit	Looks at the Destination question located in the first prompt of the Exit assessment.

Resources and User Support

User Resources

We have two articles on the Data Quality process:

- [Data Quality Process Overview](#)
- [Running and Interpreting the Data Quality Report](#)

Both articles will have a link to the recorded version of this webinar and slides.

Other helpful links

- [Sub-assessments and HUD Verifications](#)
- [Documenting the Housing Move-In Date](#)
- [Relationship To Head of Household](#)

User Resources

We understand there may need to be further training/assistance for users that are new to the process, or that have forgotten how the report process operated.

As such, we are offering assistance through the Help Desk Office Hours (Helpdesk@allchicago.org).

User Resources: Requesting Assistance

- All sessions are limited to 30 minutes (This is outside of the typical email exchange.)
- Sessions will be done online via Microsoft Teams (please ensure that Teams is available on your computer prior to the call)
- An Agency Technical Administrator, or someone with BusinessObject access, must be on the call as well
- Please have your report available at the time of the call, or email the report you plan on referencing beforehand

Q & A

Thank you!
