## OVERVIEW

This document shows the list of HUD and Federal Partner assessments created for the 2022 HUD Data Dictionary data elements. Please note this year instead of creating all new 2021 assessments WellSky updated the name of some assessments to reflect they cover multiple years. This change was only made on assessments that had no changes listed in the 2022 Data Dictionary that would require adding or removing questions from the assessments.

Information is documented by funder as to where questions need to be added or removed from assessments if you prefer to modify your existing assessments. If you modify existing assessments, be sure to re-publish the assessments.

Reminder, when adding new assessments to providers, please be sure to add applicable visibility rules.

More detailed information is listed below.

---
